

# Digital Forensics and Litigation Support

FOR LAW FIRMS AND LEGAL TEAMS

We help counsel preserve, examine and explain digital evidence, with focused discovery support and clear technical reporting for civil litigation, criminal defense, employment disputes and internal investigations.

## Examiner and specialist experience

Leadership brings 25+ years of military, technical and intelligence experience, with specialists adding approximately 30 combined years. Our team's experience includes thousands of examinations, forensic lab leadership, examiner training, university teaching and courtroom testimony.

## Support TIERS Group Provides

### Preservation and collection

Preserve devices, computers, email and cloud data with documented custody and collection methods.

### Digital evidence analysis

Analyze files, messages, metadata, deleted artifacts and timelines; explain findings and limitations.

### Advanced recovery

Assess damaged devices for authorized repair, chip-off and in-system programming where appropriate.

### Discovery and production

Prepare native files, searchable text, metadata and review-platform load files to agreed specifications.

### Expert consulting and testimony

Provide technical consultations, independent review, written findings, counsel briefings and testimony.
